

inventaprint

## ABOUT US

Inventaprint is an online platform that helps solo inventors and mid-sized companies get their products made by connecting them with vetted manufacturers. Our mission is to democratize the innovation process by simplifying it.

As inventors, we know just how hard it is to find a manufacturer who can accommodate lower volume orders, while still creating high-quality products. After continuing to run up against this problem ourselves, we set out to track down the best manufacturers around the country—from the plains of Kentucky to New Jersey.

When inventors sign-up for Inventaprint, they get immediate access to our network of the very best manufacturers in the country. We've personally handpicked each and every one with the serious solo inventor and mid-sized company in mind.

These are good, honest people, who value quality as much as we do. They're set-up to support both low and high volume orders, carry all the top-notch certifications and don't create a single part without reviewing each inventor's order and offering their suggestions.

To further simplify the process, all manufacturer communication, drawing reviews, orders, re-orders, payments and shipping takes place on our easy to use platform. The intellectual property developed during this process remains the property of the inventor.

## HOW IT WORKS

We connect inventors and mid-sized companies to a vetted network of manufacturers to bring their product ideas to life.

## WHAT DO YOU GET?

Inventaprint solves 3 key problems in the product development process- Intellectual Property protection, speed to launch, and cost-effective management of resources.

**Intellectual Property Protection:** We have a closed network of vetted manufacturers, who have signed strict intellectual property agreements to protect against user technology theft. Our platform also leverages feedback from our network of seasoned manufacturers and designers to improve on the intellectual property of parts being manufactured.

**Speed to launch:** Our platform cuts out the hassle of vetting manufacturers by providing access to our network of vetted manufacturers (e.g. depending on the project, the manufacturer selection process can take up to ~6 months without our platform).

**Resource Management:** We spent a year interviewing clients & manufacturers and have developed features which provide improved productivity to both user groups (i.e. Innovators and Manufacturers). Our project management features ensure that businesses don't have to hire back-office personnel in managing orders (e.g. part reorders, file management systems, escrow payments etc.).

**In addition,** we enable flexible bidding on the manufacturing of parts by allowing manufacturers to provide feedback for cost effective manufacturing solutions, thereby improving the feedback loop.

## PRICING

Innovators pay a subscription fee of \$300/month OR \$3,200/year (Billed upfront; 10% discount!).

\*\* Exclusive Georgia Tech student pricing (because we love our fellow Yellow Jackets):  
**6 months free subscription (\$1,800 savings per student!)**
